

INTEGRATED MANAGEMENT **SYSTEM** POLICY – IMS QUALITY, SAFETY, ENVIRONMENT AND HEALTH

SEEPIL, operating in the industrial segment in the provision of Goods and Services for Maintenance, Calibration, Testing, Certification and Technical Assistance of Industrial Valves, establishes its Integrated Management System Policy, aligned with its purpose, organizational context and strategic direction.

Senior Management commits to:

- Increasing customer satisfaction through the continuous improvement of processes, product conformity and compliance with applicable requirements for the services provided;
- Complying with all applicable laws, regulations and other requirements related to quality, environment, safety and occupational health;
- Protecting the environment, including pollution prevention, the control of environmental aspects and impacts, and the sustainable use of natural resources;
- Providing safe and healthy working conditions for the prevention of injuries and occupational diseases, eliminating hazards and reducing safety and health risks in the workplace;
- Promoting consultation and participation of workers in matters related to occupational safety and health;
- Developing the competence, awareness and quality of life of employees;
- Continuously improving process performance and the effectiveness of the Integrated Management System, ensuring sustainability, reliability and satisfactory results for all stakeholders.
